I hope to see the Groundwater Protection Ordinance on the Town Meeting Ballot in March. All the citizens of Warner should have the opportunity to vote on this important issue.

Thank you, David Karrick

Dear Members of the Planning Board,

Perhaps nothing is so precious to a community as its aquifer. In the same way, that loving parents protect their children from harmful substances, a community has the responsibility to protect itself from any industry or endeavor that places the town's water in jeopardy. Therefore, I am asking you to vote in the affirmative when it comes to the placing the proposed Groundwater Protection Ordinance on the March 14 ballot. Surely, you agree that the residents of our town should have the right to decide the future of its most fundamental resource.

Respectfully,
David Elliott

Dear Planning Board members,

As a long-time Warner resident living in the precinct near the Warner River, I ask that you please place the Groundwater Protection Ordinance on the Town ballot for a vote on March 14th. It is essential that we do everything we can to protect this valuable resource.

I appreciate the efforts made by many volunteers in bringing this important issue to the residents. I was able to attend one of the Zoom meetings and found it very informative.

Hello

I am writing in support of the Planning Board supporting the proposed GPO and hopefully having the ordinance adopted by the town at town meeting in March.

I attended some of the public information sessions via zoom and my take away was that this zoning protection was important for ensuring the future habitability of Warner. Clean water is fundamental and once polluted, extremely costly and slow to restore. I personally think a similar basic groundwater protection should be extended to all of the town, not just along the current proposed area.

Water quality and access are amongst the biggest issues that current and future generations will be faced with, it is already the case in a growing portion of this country and around the globe. I have experienced first hand while living and working in developing countries the extreme challenge of not having access to safe water. While I understand the aversion to increasing regulation, with the growth and development pressure we are seeing, I think the planning board should be focused on fundamental, forward looking and shared resources such as water. Options I am aware of could be extending this GPO zoning to the entire town and prohibiting possible commercial scale groundwater extraction from coming to town.

Thank you for your work
Bret

Dear Warner Planning Board members,

I'm writing today to express my support for putting the Groundwater Protection Ordinance on the ballot at the March town meeting. Getting more members of our community educated about and involved with issues surrounding our town's groundwater is essential for making educated decisions going forward.

Thank you very much for your attention to this matter.

Sincerely,
Emily Karmen

Hello,

I would like to see the groundwater ordinance proposal ON the March Town ballot.

Thank you,

Dianne Bischoff

Warner resident

Dear Planning Board: I urge you to carefully consider approving for town wide vote, a groundwater protection ordinance as proposed by the GW Protection committee.

With our village district wells being so shallow, they are extremely vulnerable to contamination from surface activities. The health of Warner at all levels (public health and our economic well being), requires clean water.

Sincerely,

Michael Amaral
